SEO competitor analysis template

A worksheet for your business and up to five competitors. You compare seven areas: Google rankings, Google Maps, AI answers, on-page content, technical basics, backlinks, and offer and pricing. Score each one from 0 to 2, then turn the gaps into an action list.

How to use this template

1. **Cover sheet.** Write down your business, market, date, and the location and device you check from. Add 10 keywords from Search Console, Google autocomplete and customer questions.
2. **Competitors.** Take the 3 domains seen most often in the top 10, the Google Maps leader and a company that ChatGPT or Perplexity recommends.
3. **Google and Maps.** In a private window, check every keyword (table 1) and the 3-pack for 3 keywords with your city name (table 2).
4. **AI answers.** Ask 5 customer questions in ChatGPT, Perplexity and Google. Record the companies named and the cited pages (table 3).
5. **Competitor websites.** Fill in tables 4–7. Write the tool and date next to every number.
6. **Scores.** Give 0–2 points using the scoring guide on page 5 and add them up (maximum 14 points per company).
7. **Actions.** Put every gap where a competitor leads into part 8 with a priority, an owner and a deadline.

Scoring at a glance

0 points	1 point	2 points
missing or a serious gap	average	a clear advantage

0. Cover sheet

Business name and website

Market (city, region or whole country)

Date

Filled in by

Check location (e.g. Warsaw, Mokotów)

Device (mobile / desktop)

	Name and website	Where you found it
C1		☐ Google ☐ Maps ☐ AI
C2		☐ Google ☐ Maps ☐ AI
C3		☐ Google ☐ Maps ☐ AI
C4		☐ Google ☐ Maps ☐ AI
C5		☐ Google ☐ Maps ☐ AI

Directories and marketplaces in the results (list them here, not as competitors):

> The step-by-step method (keywords, reading results, backlinks):
> **www.ai-seo-company.pl/en/blog/seo-competitor-analysis-step-by-step-guide**

1. Google rankings: who ranks for your keywords

List 10 keywords. For each, write the position in the top 10 organic results (1–10) or "–", not counting ads, Maps or the AI Overview. In the last column, note the page types in the top 3 (service page, article, directory, store).

Keyword	You	C1	C2	C3	C4	C5	Page types in the top 3
1.							
2.							
3.							
4.							
5.							
6.							
7.							
8.							
9.							
10.							
Keywords in the top 10							
Score 0–2							

2. Google Maps: the local 3-pack

Search 3 keywords that include your city or neighborhood and note who appears in the 3-pack. Then fill in the Business Profile details.

Keyword with city name	Spot 1	Spot 2	Spot 3
1.			
2.			
3.			

Business Profile	You	C1	C2	C3	C4	C5
In the 3-pack (how many of 3 keywords)						
Primary category						
Number of reviews						
Average rating						
Replies to reviews	☐	☐	☐	☐	☐	☐
Photos or posts in the last 3 months	☐	☐	☐	☐	☐	☐
Score 0–2						

3. AI answers: who ChatGPT, Perplexity and Google recommend

Ask 5 questions the way a customer would, e.g. “Which … company would you recommend in …?”. Use a new chat, ideally logged out, just as you use a private window in Google. Write down the companies named and the pages cited as sources. If Google shows no AI Overview, write “none”.

Customer question	ChatGPT	Perplexity	Google AI Overview	Cited sources
1.				
2.				
3.				
4.				
5.				

AI summary	You	C1	C2	C3	C4	C5
Questions where the name comes up (0–5)						
Company site cited as a source	☐	☐	☐	☐	☐	☐
Score 0–2						

4. On-page content

Judge titles as they appear in Google, not in the page code: Google can rewrite or truncate them.

Page element	You	C1	C2	C3	C4	C5
Keyword and city in the service page title	☐	☐	☐	☐	☐	☐
Hook in the title (price, timing, reviews)						
Separate service pages (number)						
City or neighborhood pages	☐	☐	☐	☐	☐	☐
Prices on the site	☐	☐	☐	☐	☐	☐
FAQ on service pages	☐	☐	☐	☐	☐	☐
Case studies or project write-ups	☐	☐	☐	☐	☐	☐
Comparisons, e.g. “X vs Y”	☐	☐	☐	☐	☐	☐
Tools or downloads	☐	☐	☐	☐	☐	☐
Guides or blog (date of latest post)						
Score 0–2						

5. Technical basics

Tick the box when the condition is met. In PageSpeed Insights (mobile), note the 0–100 score and the Core Web Vitals assessment from real-user data. Google's "good" thresholds: LCP within 2.5 s, INP under 200 ms, CLS under 0.1. A small site may have no such data: write "no data" and count a score of 90+ as a pass.

Technical item	You	C1	C2	C3	C4	C5
HTTPS with no warnings	☐	☐	☐	☐	☐	☐
Easy to use on a phone	☐	☐	☐	☐	☐	☐
PageSpeed: 0–100 score / CWV (pass, fail, no data)						
XML sitemap (sitemap.xml)	☐	☐	☐	☐	☐	☐
robots.txt doesn't block key pages	☐	☐	☐	☐	☐	☐
Structured data (e.g. Organization, LocalBusiness)	☐	☐	☐	☐	☐	☐
Score 0–2						

6. Backlinks

Tool and date checked

Only compare numbers from the same tool: every tool counts referring domains differently.

Link profile	You	C1	C2	C3	C4	C5
Referring domains (number)						
Referring domains to the service page						
Strongest link sources (3 examples)						
Local media, chambers, associations	☐	☐	☐	☐	☐	☐
Directories and industry sites	☐	☐	☐	☐	☐	☐
Score 0–2						

7. Offer and pricing

Offer	You	C1	C2	C3	C4	C5
Pricing on the site (yes / from … / no)						
Pricing model (package, hourly, quote)						
Contract length or minimum commitment						
What makes the offer different, in one sentence						
First step (form, phone call, free quote)						
Score 0–2						

Scoring guide: 0 to 2 points

Score each area separately for yourself and for every competitor. If one area matters more for your business (e.g. Google Maps for local services), you can count it twice: mark it in the summary.

Area	0 points	1 point	2 points
1. Google rankings	Outside the top 10 for all 10 keywords	Top 10 for 1–4 keywords	Top 10 for 5 or more keywords
2. Google Maps	Not in the 3-pack, incomplete profile	In the 3-pack for some keywords, or a complete profile with few reviews	In the 3-pack for most keywords, with fresh reviews and photos
3. AI answers	Not named in any answer	Named for 1–2 of the 5 questions	Named for 3–5 questions, or cited as a source
4. On-page content	One page for all services, no FAQ or prices	Separate service pages, but thin or without examples	A detailed page for each service and location, with FAQ and case studies
5. Technical basics	No HTTPS, or the site breaks on mobile	Works, but fails Core Web Vitals or has gaps, such as no sitemap	Passes Core Web Vitals on mobile, with a sitemap and structured data
6. Backlinks	Fewest referring domains in the set	Middle of the pack	Most referring domains, or links from media and industry sites
7. Offer and pricing	No prices and no clear first step	“From” prices or packages without details	Clear prices or ranges, a defined scope and an easy first step

Score summary

Area	Weight ×2	You	C1	C2	C3	C4	C5
1. Google rankings	☐						
2. Google Maps	☐						
3. AI answers	☐						
4. On-page content	☐						
5. Technical basics	☐						
6. Backlinks	☐						
7. Offer and pricing	☐						
Total (max 14, more with weights)							

8. Conclusions and action list

Start with the areas where you score 0 and a competitor scores 2. One action = one owner and one deadline.

Gap (area)	Who does it better	Action	Priority	Owner	Deadline
1.					
2.					
3.					
4.					
5.					
6.					
7.					
8.					

Priorities: P1 – a gap with a big impact on customer inquiries (a 2-point difference or an area weighted ×2) and an action you can put in place within a month; P2 – a high-impact gap that takes a quarter; P3 – everything else.

Next review (in 3 months, same keywords, questions and location):

Before you close the analysis

- [ ] Every number has the tool and the date next to it.
- [ ] All rankings were checked from the same location and device.
- [ ] Directories and marketplaces are listed separately, not as competitors.
- [ ] Every “0 for me, 2 for a competitor” gap has an action in the table above.
- [ ] The date of the next review is in the calendar.
